

## Cranky and Fussy?

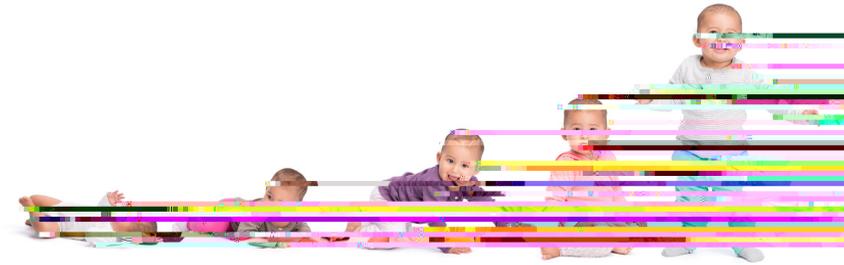

clean finger. If nothing else helps, try a dose of Tylenol or

singing, giving a pacifier, walking, swinging, bathing,

If you become overwhelmed, put your baby in a safe place

# Six Month Visit

## Vaccines

Vaccination provides the single most important opportunity to

DTaP (diphtheria, tetanus, whooping cough)

IPV (polio injection)

COVID  
Influenza

RSV antibody injection (seasonally)

Ask the nurse for Vaccine Information Statements with specific

healthychildren.org (under the Health Issues tab) and at

Vaccines 0
